Building large-scale software – on time, on budget, on target

The software-engineering company, which was founded in Hamburg, develops large scale software platforms for international clients used by millions of users with thousands of requests per second.

Failure is not an option. freiheit.com is known for their high reputation on the market for delivering projects reliably on time, on budget and on target.

For **over a quarter of a century**, we have been working for the “Who's Who” of German and European industrial and commercial companies – **across all sectors**: healthcare, trade, automotive, e-commerce, and more.

Our Community

In our engineering hubs in **Hamburg and Lisbon**, you will meet people from all over the world – different cultures, origins, languages, genders and lifestyles. We love diversity and openness.

If you ask anyone why they work here, it's pretty likely that they will say “**because of the people**” and “**because I've never learned so much in my life**”.

Our company is a place where you can be yourself, aim high, care for each other and grow without limits.

In our centrally located offices, **our community meets not only to work**, but also to play pool and have fun with team members and find some new friends.

But more importantly, we offer our members the opportunity to be responsible for realizing a complete project from the idea to the implementation, working on interesting tasks with intelligent people.
